8. DESCRIPTION AND CHARACTERISTICS OF AREA:

   Terrain: Rolling to hillside and hilltop. Very rugged with many construction hazards. Land improved: 20% unhatched part; 5% hatched portion. Homesites usually run into acreage. Highly deed restricted, both as to improvements and population. Conveniences are all reasonably available for a district of this character. This area has been developing intermittently for 25 or 30 years, and is still very sparsely settled. Its appeal is to very wealthy people who desire a sequestered homesite. Construction is of superior quality; maintenance is of the best, and architectural designs are excellent. Population is homogeneous. Property turnover is extremely limited and marketability is influenced by consideration of sacrifice sales. Recent improvements have been largely along Madeline Dr., Covington Place and the section known as Busch Gardens, and are somewhat more modest in size and occupy smaller estates. The area is a very exclusive one and could hardly be assigned less than a "high green" grade.
