8. DESCRIPTION AND CHARACTERISTICS OF AREA:
   Terrain: Rolling. Construction hazards limited to an occasional fill. Land improved 35%. Deed restricted and zoned for single-family residences. Deeds also protect from subversive racial restrictions. Conveniences are all readily available. This area was subdivided shortly before the depression but development has largely taken place within past 3 years. Its sightly location has been fully taken advantage of in its platting and increases its charm. Construction, maintenance and architectural designs are much above average, undoubtedly due to the fact that a large percent were built under FHA supervision. Population, the majority of whom are connected with the 20th Century Fox Studios, and largely of the upper medium income group, is homogeneous. Land values are currently from $35 to $50 per front foot with an upward tendency. The area is a popular one with a decided upward trend, and is accorded a "low green" grade.
