8. DESCRIPTION AND CHARACTERISTICS OF AREA:
   Terrain: Rolling, hillside to hilltop. Topographic hazards increase cost of construction in many cases. Land improved 50% of a possible 80% susceptible of development. Deed restrictions, including perpetual racial protection, are adequate and enforced. Conveniences are all reasonably available for an area of this character. This area is from 15 to 20 years old. It was more or less dormant for a number of years but is now showing a revival and activity has been quite noticeable for past 5 years. Construction is largely super standard quality, and maintenance is of excellent quality. Architectural designs are harmonious and platting shows great engineering skill. Population is homogeneous and community pride is evident. This is one of the best developments sponsored by the Los Angeles Investment Co. Homesites sell for from $1500 up and many afford views of a large section of the city of Los Angeles. There are no apparent derogatory influences and the trend of desirability will be upward for many years to come. The area is splendidly located and is accorded a "high green" grade.
