7. TOTAL TAX RATE PER $1000 (1939) $ 52.70 1939

8. DESCRIPTION AND CHARACTERISTICS OF AREA:

   Terrain: Level to hillside with a canyon in the hatched portion. There are comparatively few construction hazards. Land improved, exclusive of hatched portion, 90%. The area is deed restricted and is protected against infiltration of subversive racial elements. Deed provisions and zoning limit construction principally to single-family residences with multi-family residences being permitted in certain stated locations. Conveniences are all readily available. This area was subdivided and placed on the market about 25 years ago and is a popular residential district. Type of improvements cover a wide range, running from five-room bungalows to ten-room, two-story residences, some of them being of the mansion type. Maintenance is uniformly good and architectural design is generally so. Population is homogeneous and the area as a whole gives the impression of being harmonious. Residential lot values approximate $1.0 per front foot. While permitted in some parts, there are very few multi-family dwellings and these conform to the general pattern of the neighborhood. Age and obsolescence, while minimized by excellent upkeep, are present. It is believed, however, that the area will remain desirable for a number of years to come, and is therefore accorded a "medium blue" grade.

9. LOCATION: Hollywood Blvd. Sec. SECURITY GRADE: 2nd AREA NO. B-64 DATE: 2-21-39

CAUTION: This area is currently affected in whole or in part by an Ad valorem Tax District. Individual properties should be checked for this hazard.
