8. DESCRIPTION AND CHARACTERISTICS OF AREA:
Terrain: Level. No construction hazards. Land improved 5%. Deed restrictions govern improvements. Provide uniform set backs and protect against racial hazards. Convenience are as yet inadequate. Many streets unimproved and sewers lacking. This subdivision has just been placed on the market and seems to have made a ready appeal to the workers in nearby airplane factories and Los Angeles Municipal Airport (Miles Field). Improvements are said to be 100% by FHA Title II insured loans, and construction is therefore of good quality. Proximity to airfield, oil wells and oil refineries are detrimental influences. Pattern of area is by no means established and, therefore, only a provisional "low blue" grade is accorded.
