8. DESCRIPTION AND CHARACTERISTICS OF AREA:
   Terrain: Level with no construction hazards. Land improved: 10% in hatched
   portion; 15% in balance. Deed restricted to single-family dwellings. Zoning,
   single-family dwellings. Conveniences are all available. Transportation somewhat distant from eastern part. This is a comparatively new district and has been largely developed with the aid of FHA Title II financing. This has been a very active district for the past two years, but has slowed down in the past several months. This is a new area of moderately priced well constructed homes, practically all of which have been built in the past 3 years. The population is homogeneous. Maintenance shows pride of ownership and architectural designs are harmonious. The necessity for further improvements in this area for the present is questioned. The pattern of the hatched portion has not been as yet definitely established. The area is accorded a "low blue" grade.
