8. DESCRIPTION AND CHARACTERISTICS OF AREA:
   Terrain: Level with no construction hazards. Land improved 60%. Zoning is mixed but generally single family residential. Conveniences are all readily available. This is one of the oldest areas in Pomona, development having begun over 50 years ago. It is suffering from excessive age and the fact that it is on the "wrong side of the tracks". It is largely surrounded by business, industry and Mexican and Negro districts. Construction is quite generally substandard and maintenance is spotted and only fair at best. Both population and improvements are extremely heterogeneous. A new subdivision is being attempted on 5th and 6th Sts west of Myrtle and about 20 new improvements built during the past years. Local realtors express the opinion that this is a misplaced development. The few Mexicans and Negro families are largely adjacent to the "red" area west and south and is said not to be a threat to the greatest part of this area. Indications are that the further decline of this area will be slow and that it will not become entirely blighted for many years to come. Therefore a "low yellow" grade is accorded.
