8. DESCRIPTION AND CHARACTERISTICS OF AREA:
Terrain: Level to rolling, no construction hazards. Land improved 85%. Dead restrictions expired. Zoning varies from single-family to unlimited residential. Conveniences all readily available. District considered high grade up to 15 to 20 years ago, and considerable pride of ownership still evident in many parts. Area is rapidly declining and many large old homes being converted into multi-family dwellings and boarding houses. Its location and attractive thoroughfares justify belief that it will rapidly be converted into medium to high grade apartment house district. Scattered throughout the area are already numerous small apartment houses and other multi-family structures of the better sort, but it is still predominantly a district of large old obsolete homes. Although there is the threat that it may become a blighted area through infiltration of subversive racial elements from districts south, the present outlook is that this will not occur within next 5 or 10 years. The area is, however, on this account accorded only a "low yellow" grade.
