4. OVERHANG OF HOME PROPERTIES: a. HOLC None by b. Institutions Few

5. SALE OF HOME PROPERTIES (3 yr.) a. HOLC 1937-8 2 b. Institutions Few

6. MORTGAGE FUNDS: FHA

7. TOTAL TAX RATE PER $1000 (193_ ) $52.05 County $57.80 - City $4.25

8. DESCRIPTION AND CHARACTERISTICS OF AREA: Terrain: Low lying level, flood threat, no construction hazards. Land improved 65%. Deed restrictions are moderate but protect against racial hazards in perpetuity. Zoning conforms to restrictions. Conveniences are all reasonably available, including interurban service to Los Angeles. Street improvements are not of best quality and sewers are not all in. This is a new subdivision which has been developed within the past 5 years, largely with FHA Title I and Title II financing. Construction ranges from substandard to standard quality. Maintenance very generally indicates pride of occupancy. Architectural designs, even in the case of Title I Class 3 structures, are individually attractive and harmonious as a whole. Population is seemingly homogeneous. Lot values are low running from $8 to $15 per front foot. In spite of wide range of construction quality, improvements give the impression of uniformity. Located between the Signal Hill and Wilmington oil fields the area is subject to the odors from both. While flood control work is said to have overcome the flood threat to this district, it is at least a mental hazard. Adjacency to the "red" area to the east is also considered a subversive influence. Although this area has the advantage of being located close to the City Center and has practically all new improvements, it is thought that trend of desirability is already downward, and it is deemed a misplaced improvement. The area is accorded a "medial yellow" grade.

9. LOCATION Long Beach SECURITY GRADE 3rd AREA NO. 154. DATE 5-3-39
