6. MORTGAGE FUNDS: Ample to Limited

7. TOTAL TAX RATE PER $1000 (1937-8) $53.23 County $37.80 - City $15.43

8. DESCRIPTION AND CHARACTERISTICS OF AREA:

Terrain: Level to rolling with lowering elevation from north to south. No construction hazards. Land improved 90%. Zoning is mixed single and multi-family with business permitted along numerous thoroughfares. Conveniences are all readily available. This is one of the older residential sections of Long Beach and much of its development took place during the boom period of the early 20's. Construction during period was generally of substandard quality and much of it was of the "Jerry built" variety. As a result of this the area presents a heterogeneous aspect. This is particularly true of that part west of Redondo Ave. The eastern part is newer and somewhat better grade. However, the whole area is spotted and is slowly trending to income properties. Lot values range from $20 to $200 per front foot, prices depreciating noticeably going north. Newer construction is of standard quality and maintenance in general is of fair character. Population, while not homogeneous, is generally stable. There are many multiple family structures in the area, mostly of medium quality, which cater to the tourist trade. While this area is declining, it will be many years before it becomes generally blighted. It is therefore thought entitled to a "moderately yellow" grade.

9. LOCATION Long Beach SECURITY GRADE: 3rd AREA NO. 0-156 DATE: 5-4-39
