   b. Institutions: Few

6. MORTGAGE FUNDS: Ample

7. TOTAL TAX RATE PER $1000 (1937): $68.50

8. DESCRIPTION AND CHARACTERISTICS OF AREA:
   Terrain: Beach level to rolling and hillside, with many arroyos traversing area from the east to west. No serious construction hazards. Improvements are built on sand dunes from Highland Ave. to beach. Land improved 60%. Zoning is varied and inadequate. Conveniences are all readily available including interurban transportation. Development of this area along the beach began some 35 or 40 years ago, and has proceeded slowly since, the past two or three years having been the period of its greatest activity. This is considered the most popular and appealing beach resort in the vicinity of Los Angeles. Construction varies from "shack" to standard quality, new improvements being of very much better character. Maintenance is spotted but averages better than in most beach resorts. This is usual in this type of community the population is heterogeneous. The multiple family structures are generally of poor quality and lacking in appeal. The 30 foot lots which prevail in the area give it a crowded aspect. The area is accorded a "medium yellow" grade.

9. LOCATION: Manhattan Beach
   SECURITY GRADE: 3rd
   AREA NO.: 6-160
   DATE: 3/21/38
