8. **DESCRIPTION AND CHARACTERISTICS OF AREA:**
   - Terrain: There is a slight drainage problem here although insufficient to cause construction hazards. Land improved 50%. Deed restrictions are so drawn as to permit substandard construction; they provide for uniform set backs and protect against racial hazards. Zoning is single family residential except small multi-family permitted at intersection. This is a new area and conveniences are as yet more or less inadequate and street improvements are completely lacking. There are some unimproved streets. This subdivision was placed upon the market within the past year and is now in process of rapid development. There are completed or under construction 300 new 4 room dwellings, which are being sold from $2500 to $2990, with a down payment of $150. Construction is substandard with an inclination toward "Jerry building". Architectural designs are attractive and harmonious and about 8 different styles are being used. The location lacks appeal but is favorably affected by its convenience to the Douglas Aircraft factory. The distance from all conveniences, the general poor quality of construction, and the "pressure" development of the area preclude other than a medium C. grade.
