8. DESCRIPTION AND CHARACTERISTICS OF AREA:
   Terrain: Level with no construction hazards. Land improved 20%. Deed restricted both to construction and population. Conveniences are available but not readily so. The 44 new improvements in the area have been financed under FHA Title I with secondary financing. Down payments have been on the basis of a 10% minimum. Construction and architectural design have been above FHA Title I average and population is of good quality. Development was begun under the assumption that an Ad valorem district indebtedness would be satisfactorily disposed of but it was recently found that this would not be the case. Development, therefore, ceased and the situation at present is a complicated one. If, as and when the Ad valorem indebtedness is adjusted, the grade of the area will be advanced and it is said that the Title I Class 3 financing may be changed to Title 2, and the secondary financing wiped out. Under the circumstances, the area is accorded a "Provisional Red" grade.
