8. DESCRIPTION AND CHARACTERISTICS OF AREA:

Terrain: Level. No flood or construction hazards. Land improved 90%. Zoning is mixed, but improvements are largely single family dwellings. Conveniences are all readily available. This is the "melting pot" area of Los Angeles, and has long been thoroughly blighted. The Negro concentration is largely in the eastern two thirds of the area. Original construction was evidently of fair quality but lack of proper maintenance is notable. Population is uniformly of poor quality and many improvements are in a state of dilapidation. This area is a fit location for a slum clearance project.

The area is accorded a "low red" grade.
