8. DESCRIPTION AND CHARACTERISTICS OF AREA:
   Terrain: Level with no construction hazards. Land improved 60%. There are no deed restrictions and zoning is miscellaneous. Conveniences are all reasonably available. The town of Gardena, which is the center of a thickly populated farming section had its inception some 30 years ago. It is surrounded by small farms, truck and flower gardens, which are largely operated by Japanese and Mexicans. There are also a number of oil wells and tank farms in the vicinity. Construction and maintenance are of mediocre quality, and both population and improvements are heterogeneous in character. Present indications are that the Japanese and Mexican population will increase. The town, however, while of low grade, is not entirely blighted and is accorded a "high red" classification.
