For the ten year period, 1920-1930, the City of Beverly Hills had the largest percentage of growth of population of any city in the United States.

In 1930 - Population: 17,429

16,781 - white people (2,002 foreign born white)
397 - negroes (all servants)
251 - unclassified or misc.

1. The average age of all multiple dwellings in the city is 6.30 years. This shows that the greatest percentage of multiples have been built since 1930. Vacancy percentages increase in multiple dwellings, and this is the reason why the percentage increase of living accommodations is greater than the percentage increase in population.

The number of persons totally unemployed in the City of Beverly Hills in December 1937, was 471.

The average number of persons per family in 1930 was 2.88. (1930 Census).
