14. **CLARIFYING REMARKS**:  
    There were several homes built in this area recently, averaging in sale price $5500. These, however, are thought to be over-improvements, but do not tend to distort the average current range of sales values as these few new homes were not included in 1937 range. (6) In the lower and central part of the area, land occupancy is about 80%, whereas in extreme northern part, along ridge of hills, the occupancy is only 5% to 10%. It has been difficult to grade this area and many different opinions are held relative to its future.
