14. CLARIFYING REMARKS:
    There are many modern, attractive stucco bungalows in this area, but not sufficiently concentrated to justify higher rating. (7*) This range does not include new construction, mentioned in line 11, but considers the type of home which were extant in 1929, for comparison. This area is generally known as EAST OAKLAND. This is a large, irregular shaped area and should in time be broken down and regraded. The treatment which has been accorded it, however, seems best for the present, pending development of better defined trends.
