5. CLARIFYING REMARKS: This area lies outside city limits, and has no zoning but is moderately good restricted. That this is a very popular district is indicated by its high percent of home ownership, occupancy and the amount of recent new construction. This is a middle class area with a homogeneous population and type of improvements. The quality of construction and maintenance are of a good character. The area's proximity to both the Western Pacific and Southern Railroads and the prospect that adjacent districts may develop into highly industrialized sections preclude the assignment of higher than a "low blue" grade.
