   c. CLARIFYING REMARKS: dential it is predominantly a single family district. This might be
tored a buffer area. Its characteristics are largely similar to those of the ad-
joining higher grade areas to the west while desirability is affected by adjacen-
to cemeteries, prospective industrial districts and business zoning on Harding &
California streets. Some of the newer dwellings would be a credit to a 2nd grade
area but they are considered misplaced improvements and it is not believed that the
area will ever attain a higher grade. Owing to its long term prospects the area can
only be accorded a "low yellow" grade.
